M&M Control's Featured Manufacturer - October 2022

1-800-876-0036

Founded in 1926, Spence is an essential engineering and manufacturing company for HVAC, commercial, and institutional facilities. Technicians use Spence products for heating systems in buildings, institutions, and district heating systems as well as industrial plants. Widely recognized as a leader in the steam regulator and flow control fields, Spence technologies offer the maximum application and selection flexibility your steam system and requirements of today's industrial marketplace needs.

Spence Regulator Portfolio

The E Main Valve meets the requirements of a large majority of regulator installations as it can be controlled by various types of interchangeable pilots. Spence regulators are known for their universal adaptability, accurate regulation, dependable service, and low maintenance costs..

Pilots customize your regulator to meet your specific application, and control pressure, temperature, differential pressure, or back pressure either mechanically or with a pneumatic pilot.

Offered in a diverse selection for a wide range of applications, **Control Valve** models include the Type J Valve and the K Series Types K1, K3, & K4 Valves. Pneumatic and electric actuator designs control mixing or diverting applications, or for economical control of steam, water, gas, and process applications.

Direct Operated Valves provide pressure and temperature control for your application. The 2000 Series is a self-operated temperature regulator available with single or double seat in direct or reverse acting. Also available with two seat areas for 3-way mixing.

M&M offers a full line of **SPENCE** items.
Call **M&M Control** for help with your application.
