## BX Plus

## Industrial Thermometer with Integrated RTD

The Trerice BX-Plus has all the standard features of the original BX Series Industrial Thermometer, but with a "Plus". The "Plus" being an internally mounted $100 \Omega$ or 1000 R RTD, allowing for remote temperature monitoring, while simultaneously providing local indication. This patented* dual sensor design eliminates the need for additional instrumentation or connections when designing a system to include both mechanical and electronic temperature sensing.
*U.S. Pat. Nos. 5,664,885 and 5,769,542.

- Optional features available:

Please consult the Options \& Accessories Section for details.

- These instruments are specifically designed for use with Trerice Digital Indicators (refer to the Electronic Temperature Sensor Section) and Electronic Controllers (refer to the Control Section).
